Solarpark Scaldia, The Netherlands | 54,5 MW

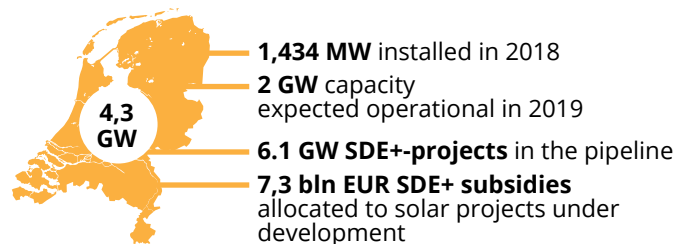

THE GROWTH CONTINUES...

The Dutch market has a great outlook for the solar PV sector: ambitious government regulated renewable energy targets and excellent business cases for residential, small business and large-scale projects (SDE+ subsidy scheme). The Dutch market has been growing consistently since 2014 and considerably faster than the global market.

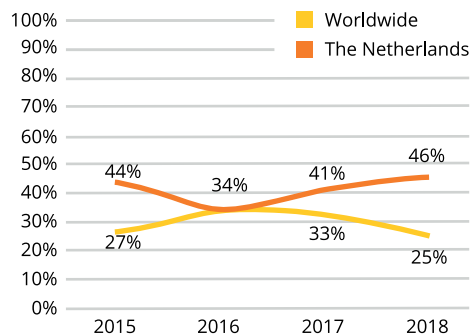

SDE+ subsidy allocated projects are looking for developers, EPC-contractors, financiers and high-end products and services. The residential sector still benefits from net-metering until 2021 and post-2021 a guaranteed payback period of maximum seven years.

¹The Netherlands growth rate: Dutch Solar Quarterly Q1 2019, Dutch New Energy Research. Worldwide growth rate: Renewables 2018, International Energy Agency.

YOUR GATEWAY TO THE DUTCH MARKET

With 250+ exhibitors from 25+ countries and 13.000+ professional visitors, **Solar Solutions International is the largest solar trade fair of North-Western Europe.** Our objective is connecting businesses, that is why Solar Solutions International is your perfect gateway to the Dutch solar market. Participate and establish new relations with producers, importers, resellers, installers, property-project owners, financiers and investors. We make exhibiting easy, we offer professional services and competitive prices. The venue is situated next to Amsterdam Schiphol Airport and hotels are abundant in the region.

Currently we are preparing the 8th edition and are expecting a record number of exhibitors and attendees. Last year we sold out and in 2020 we expect to have a greater demand for space than we are able to supply. Applications will be processed based on date of receipt.

BENEFITS

- Largest solar trade fair of North-Western Europe
- Attractively priced, full service
- Your personal exhibitor dashboard, participation made easy
- Invite your prospects and relations for free
- Quality contacts with a quality audience.
